# British rule in Africa between the Empire and the Commonwealth of Nations

**23-25 th January 2025**

Strada Cappuccini 2A- Aosta

The aim of the conference is to reflect more fully on the nature of certain conflicts – ethnic, socio-economic, religious – within so-called British Africa, while pursuing a threefold goal: to highlight their complex and composite nature; to reflect on the different attempts to resolve them; and to shed more light on both British foreign policy and the role of the Commonwealth as an instrument of transnational global governance. Focusing on reasons and modalities of the new British prominence in Africa, therefore, also represents an approach of studying the Commonwealth from an «outside in» perspective and the ways in which its modern structure developed.

The detailed program of the conference is available on the website ww.univda.it or at the following QR CODE

Free entrance.
